

We are currently looking for:

R&D Engineer (Mechanical - Design-Focused)

Research & Development

Melaka, Malaysia

Full-time, On-site

Your Tasks:

- Design optical sensors and support existing products throughout their life cycle.
- Find design solutions with engineers from optics, electronics, and industrial engineering.
- Support other technical experts to optimize manufacturing and advance automated assembly.
- Conduct product verification testing and modify the product based on test results.
- Write concise documentation to communicate results and status within the organization.
- Work in international engineering teams with coworkers from Asia and Europe

Your Qualifications:

- Bachelor's degree in mechanical engineering or equivalent (Master's degree is a plus)
- Hands-on experience with CAD systems and drawings. Knowledge in ISO 8015 is a plus.
- Knowledge in adjacent disciplines e.g. optics, electronics, and manufacturing technologies.
- Proven knowledge in the evaluation of solutions against industry standards (CE-Compliance)
- Ability to present in front of stakeholders and managers.
- High degree of independence and a systematic way of working
- Willingness to take on responsibility and implement ideas with great commitment.
- Required languages: English. German is a plus.

Benefits

- Flat Structures
- Individual development opportunities
- Great company cultures and values
- Local and overseas learning opportunity
